277V BREAKER LOCKOUT – 6PC TECHNICAL DATA SHEET

PRODUCT DESCRIPTION ------

This range of 'No Hole' circuit breaker lockouts are ideal for breakers that do not have any built in locking facility. The unique design, with thumb wheel operation clasps onto the switch providing secure locking protection. Can be used with lockout cleats for hard to lock longer sliding switches and switches with large angular rotation.

Lockout Cleats - Ensures positive lockout for hard to lock long sliding switch throws and switches with a large angular rotation. Snap-on and off design to use only when required.

PHYSICAL SPECIFICATIONS

Fits Switches: 16.5mm (5/8") wide x 11.6mm (1/2") thick (Up to 277 Volt).Material: Made of rugged polypropylene and impact modified nylon.Color: Red

ASSEMBLY INSTRUCTIONS

- 1. Place circuit breaker in the **OFF** position (figure 1).
- 2. Place the lockout component over the circuit breaker switch tongue as shown (figure 2). Rotate thumb wheel counter-clockwise to release the locking clamp if necessary.
- 3. Rotate thumbwheel clockwise to secure the lockout device to the circuit breaker switch tongue (figure 3).
- 4. Flip the cover over the lockout, blocking access to the thumb wheel (figure 4).
- 5. Verify that the circuit breaker tongue switch is securely fastened and cannot be switched on.
- 6. Lock in position with a padlock or lockout hasp and attach a safety tag as required (figure 5).

- 1. Snap on the locking cleat to the base of circuit breaker lockout (figure 1)
- 2. Once attached to circuit breaker lockout follow assembly instuctions above.
